Cumulative Author-Title Index

For: Vol. 1, Nos. 1, 2, 3, 4 (1979-1980)
Vol. 2, Nos. 1, 2, 3, 4 (1981-1982)
Vol. 3, Nos. 1, 2, 3, 4 (1982-1984)
Vol. 4, Nos. 1, 2, 3, 4 (1985-1986)

Abstracts of Heat Treating Literature—1980 ..... 2(2) 150—203
Abstracts of Heat Treating Literature—1981 ..... 2(3) 250—214
Abstracts of Heat Treating Literature, January—August, 1982 ..... 2(4) 375—422
Abstracts of Heat Treating Literature, September-December, 1982 ..... 3(1) 51—72
Abstracts of Heat Treating Literature, January—June, 1983 ..... 3(2) 129—172
Abstracts of Heat Treating Literature, June-December, 1983 ..... 3(3) 254-285
Abstracts of Heat Treating Literature, January—August, 1984 ..... 3(4) 290—422
Abstracts of Heat Treating Literature, September, 1984—January 1985 ..... 4(1) 84—131
Abstracts of Heat Treating Literature, February, 1985—June, 1985 ..... 4(2) 201—212
Abstracts of Heat Treating Literature, July, 1985—March 1986 ..... 4(3) 283—299
Abstracts of Heat Treating Literature, April, 1986—October, 1986 ..... 4(4) 394
Age Hardening in a Duplex Stainless Steel: Solomon, H.D. ..... 3(1) 3—15
Amicarelli, V.: Manganese Diffusion Coatings of Some Conventional and Sintered Steels ..... 3(4) 344—352
Analytical Approach for Establishing Case Depth Requirements in Carburized Gears, An: Sharma, A.K., Walter, G.H., and Breen, D.H. ..... 1(1) 48—57
Anctil, A.A.: Characterization of Electroslag Remelted and Ladle Refined, Electric Furnace Melted 4340 Steel Armor .... 4(4) 317—325
Fracture Toughness and Fatigue Properties of VASCO X-2 Steel Gear Materials ..... 2(4) 331-336
Split Heat Mechanical Property Comparison of ESR and VAR 4340 Steel ..... 4(2) 177—183
Annealing of Cold-Rolled Rephosphorized Steels Containing Si and CB: Pradhan, R.R. ..... 2(1) 73—82
Applicability of Hardenability Concepts in Heat Treatment of Steels: Doane, D. ..... 1(1) 5—30
Applications of Fluidized Bed Furnaces for the Heat Treatment of Tool Steels: Shepherd, G.N. ..... 2(3) 217—224
Application of Instrumentation to Achieve Precision in Carburizing: Koebel, K. ..... 1(2) 23—29
Approaching Austempered Ductile Iron Properties by Controlled Cooling in the Foundry: Janowak, J.R., and Gundlach, R.B. ..... 4(1) 25—31
Arai, T.: Carbide Coating Process by Use of Molten Borax in Japan ..... 1(2) 15—22
Arnson, H.L.: Hardenability of Low- and Medium-Carbon Mn-Cr-Ni-Mo Steels ..... 3(3) 183—192
Ashida, Y.: Strengthening and Toughening of Cr-Ni-Mn-V Austenitic Hot Work Tool Steels ..... 2(4) 321—330
Austempered Ductile Iron — Process Control and Quality Assurance: Loper, C.R., Jr. and Voigt, R.C. ..... 3(4) 291—309
Azrin, M.: Fracture Toughness and Fatigue Properties of VASCO X-2 Steel Gear Materials ..... 2(4) 331—336
Bain, E.C.: Factors Affecting the Inherent Hardenability of Steel (Heat Treating Classic) ..... 1(2) 57—100
Banerjee, R.L.: Effect of Room Temperature Aging on Low Temperature Transformation of Retained Austenite ... 3(4) 353—355
X-Ray Diffraction Study of the Low Temperature Transformation of Retained Austenite ..... 3(1) 48—50
Baozhu, G.: Effect of Low-Temperature Isothermal Heat Treatments on the Fracture of 4340 Steel, The ..... 4(4) 365—372
Basic Requirements for Reducing the Consumption of Carburizing Gases: Wyss, U., Hoffman, R. and Neumann, F. ..... 1(3) 14—23
Bates, C.E.: Evaluating Quenchants and Facilities for Hardening Steel ..... 3(2) 83—99
Beck, G.: Relationship Between Quenching Process, Hardness Depth and Quench Defects in Steels ..... 1(3) 50—56
Bell T.: Fatigue Characteristics of Plasma Nitrided Three Pct Cr-Mo Steel, The ..... 2(3) 232—237
Blackmore, P.: Effects of Metallurgical Process Variables on the Properties of Austempered Ductile Irons, The ..... 3(4) 310—325
Blarasin, A.: Origin and Development of Residual Stresses Induced by Laser Surface-Hardening Treatments ..... 3(3) 192—204
Bobart, G.F.: Innovative Induction Heat Treat Systems ..... 2(4) 351—358
Bocchini, G.E.: Manganese Diffusion Coatings of Some Conventional and Sintered Steels ..... 3(4) 344—352
Boghetich, G.: Manganese Diffusion Coatings of Some Conventional and Sintered Steels ..... 3(4) 344—352
Book Review — Steel and Its Heat Treatment, Second Edition, K.-E. Thelning: Stickels, C.A. ..... 3(4) 356
Boyd, J.D.: Microalloying and Precipitation in Cr-V Rail Steels ..... 3(3) 192—204
Breen, D.H.: Analytical Approach for Establishing Case Depth Requirements in Carburized Gears, An ..... 1(1) 48—57
Breitzig, R.W.: Future Alloys for High Temperature Heat Treating Equipment ..... 1(1) 81—86
Buck, R.M.: Influence of Sub-Zero and Shot-Peening Treatments on Impact and Fatigue Fracture Properties of Case-Hardened Steels ..... 2(1) 43—53
Byrer, T.G.: Induction Tempering of Steel: Part I. Development of an Effective Tempering Parameter ..... 4(1) 39—46
Induction Tempering of Steel: Part II. Effect of Process Variables ..... 4(1) 47—54

Calculation of the Equilibrium Composition of Blended Gases for Heat Treating Furnace: Stickels, C.A. ..... 1(1) 31—41
Carbide Coating Process by Use of Molten Borax Bath in Japan: Arai, T. ..... 1(2) 15—22
Carbonitriding at 1050° in a Glow-discharge Plasma: Grube W.L. and Koistinen, D.P. ..... 2(3) 211—216
Carburization of a High-Manganese, Low C Steel by Methane Nitrogen Gas Mixtures: Nester, F., Rostoker, W., and Domagala, R.F. ..... 1(1) 58—63
Castagna, M.: Influence of Direct Quenching from the Forging Temperature on the Mechanical Properties of a Hardened Boron Containing Steel, The ..... 4(2) 194—200
Cento, L.: Manganese Diffusion Coatings of Some Conventional and Sintered Steels ..... 3(4) 344—352

Cento, L.: Manganese Diffusion Coatings of Some Conventional and Sintered Steels ..... 3(4) 344—352

Characteristics of the Nitrogen-Base Atmosphere Produced by Passing an N_2H_2O Mixture Through a Hot-Charcoal Layer, Some: Chen, T. -C., and Hwang, C. -H. ..... 4(1) 75—83
Characterization of Electroslag Remelted and Ladle Refined, Electric Furnace Melted 4340 Steel Armor: Thomas, T.S, and Anctil, A.A. ..... 4(4) 317—325
Chen-Hsien, H.: Characteristics of the Nitrogen-Base Atmsophere Produced by Passing a N_2H_2O Mixture Through a Hot-Charcoal Layer, Some ..... 4(1) 75—83
Cleavage Fracture Strength of a 26Cr-1Mo Ferritic Stainless Steel: Veistinen, M.K., and Lindroos, V.K. ..... 4(1) 56—68
Colombo, R.L.: Influence of Direct Quenching from the Forging Temperature on the Mechanical Properties of a Hardened Boron Containing Steel, The ..... 4(2) 194—200
On the Soft Layer in Carburized Gears ..... 3(2) 126—128
Combustion of Finned Steel Tubing During Stress Relief Heat Treatment: Johnson, A.A. Von Fraunhofer, J.A., and Jannett, E.W. ..... 4(3) 265—271
Combustion Systems and Pressure Control — How to Tune Combustion Systems for Fuel Savings: Reed, R.J. ..... 1(1) 93—94
Coppa, P.: Residual Stresses Induced by Localized Laser Hardening Treatments on Steels and Cast Iron ..... 4(3) 272—280
Corrections ..... 1(4) 72
Correlation of Measurements of Retained Austenite in Carburized Steels by X-Ray Diffraction and Quantitative Metallography: Eldis, G.T. ..... 1(3) 24—30

Dawes, C.: Re-Appraisal of Nitrocarburising and Nitriding When Applied to the Design and Manufacture of Non-Alloy Steel Automobile Components, A ..... 1(2) 30—42
Deep NITROC Treatment — New Nitriding Process to Improve Fatigue Life of Crankshafts:, A Michalek, H., and Walters, G.H. ..... 4(4) 326—337
DeSanctis, M.: Origin and Development of Residual Stresses Induced by Laser Surface-Hardening Treatments ..... 3(3) 129—204
Development of Normalized and Tempered Al-B Treated 1¼Cr-½Mo Steel Plate, The: Watanabe, S., Furusawa, J., Nakanishi, M., and Ohtani, H ..... 1(4) 61—67
Dhooge, A.: Reheat Cracking in Welded Structures During Stress Relief Heat Treatments ..... 1(1) 72—80
DiDonato, D.: Prediction of Cast Optimal Gas Feed Mixtures for Carburization ..... 4(4) 373—386
Diesburg, D.E.: Influence of Sub-Zero and Shot-Peening Treatments on Impact and Fatigue Fracture Properties of Case-Hardened Steels ..... 2(1) 43—53
Direct Atmosphere Generation and Control in Heat Treatment Furnaces: Goehring, W. and Luiten, C.H. ..... 1(4) 10—14
Doane, D.: Applicability of Hardenability Concepts in Heat Treatment of Steels ..... 1(1) 5—30
Domagala, R.F.: Carburization of a High-Manganese, Low C Steel by Methane Nitrogen Gas Mixtures ..... 1(1) 58—63
Downing, H.L.: Induction Case Hardening of Steel ..... 4(3) 253—264
Drenth, B.R.: Heat Treatment, Aging Effects, and Microstructure of 12 Pct Cr Steels ..... 3(3) 237—248

Effect of Composition on Distance to First Bainite in Carburized Steels: Eldis, G.T., and Smith, Y.E. ..... 2(1) 62—72
Effect of Heat Treatment, Mechanical Deformation, and Alloying Element Additions on the Rate of Bainite Formation in Austempered Ductile Irons, The: Moore, D.J., Rouns, T.N., and Rundman, K.B. ..... 4(1) 7—24
Effect of Low-Temperature Isothermal Heat Treatments on the Fracture of 4340 Steel, The: Krauss, G., and Baozhu, G. ..... 4(4) 365—372
Effect of Phosphorous Content and Proeutectoid Carbide Distribution on the Fracture Behavior of 52100 Steel, The: Shen, F.S. and Krauss, G. ..... 2(3) 238—249
Effect of Room Temperature Aging on Low Temperature Transformation of Retained Austenite: Banerjee, R.L. ..... 3(4) 353—355
Effect of Segregation on the Formation of Austempered Ductile Iron, The: Schissler, J.M., and Saverna, J. ..... 4(2) 167—176
Effect of Temperature Gradient on the Quenching Power in Fluidized Beds: Luty, W. ..... 3(2) 107—113
Effect of Thermal Processing Variations of the Mechanical Properties and Microstructure of a Precipitation Hardening HSLA Steel: Hicho, G.E., Singhal, S., Smith, L.C. and Fields, R.J. ..... 3(3) 205—212
Effects of Manganese, Chromium, and Molybdenum on the Isothermal Transformation of Austenite in Eutectoid Steels: Park, Y.J., and Fletcher, F.B. ..... 4(3) 247—252
Effects of Metallurgical Process Variables on the Properties of Austempered Ductile Irons, The: Blackmore, P. and Harding, R. ..... 3(4) 310—325
Effects of Phosphorous and Carbon on the Hardenability of 41XX Type Steels, The: Jacobs, F.A. and Krauss, G. ... 2(2) 139—146
Eldis, G.T.: Correlation of Measurements of Retained Austenite in Carburized Steels by X-Ray Diffraction and Quantitative Metallography ..... 1(3) 24—30
Effect of Composition on Distance to First Bainite in Carburized Steels ..... 2(1) 62—72
Hyperbolic Secant Method for Predicting Jominy Hardenability: An Example Using 0.2C-Ni-Cr-Mo Steels ..... 4(4) 352—364
Electron Beam Surface Hardening Utilizing Computer Control: Hanson, R.C. ..... 3(1) 31—37
Energy Savings on Continuous Heat Treat Equipment: Jayaraman, V ..... 3(1) 23—29
Engineering Method to Judge the Quench-Hardening of Steel from Cooling Curves of Quenching Oils, An: Tamura, I., Shimizu, N., and Okada, T. ..... 3(4) 335—343
Ericsson, T.: Residual Stresses in the Soft Pearlite Layer of Carburized Steel ..... 1(3) 3—13
Study of Reactions Occurring During the Carbonitriding Process, A ..... 2(1) 3—19
Evaluating Quenchants and Facilities for Hardening Steel: Part II Monroe, R.W. and Bates, C.E. ..... 3(2) 83—99
Evaluation of Gas Carburizing in a New Fluidized-Bed Furnace: Moore, J.J. and Storey, G.G. ..... 2(2) 118—120
Exothermic-Endothermic Gas Generator, The: Stickels, C.A. ..... 4(4) 338—351

Factors Affecting the Inherent Hardenability of Steel (Heat Treating Classic): Bain, E.C. ..... 1(2) 57—100
Farkas, Sz.: Plasma Nitriding Improves Service Behavior of Textile Machine Components ..... 1(4) 15—20
Fatigue Characteristics of Plasma Nitrided Three Pct Cr-Mo Steel, The: Bell, T. and Loh, N.L ..... 2(3) 232—237
Fatigue of Case-Hardened Steels; Role of Residual Macro- and Microstresses: Mittemeijer, E.J. ..... 3(2) 114—119
Feasibility Study on Nitriding of Aluminum by Surface Melting, A: Hioki, S., Yamada, T., Hatano, K., and Ibaragi, Y. ..... 1(3) 65—72
